Applicants have made amendments that have changed the scope of the claims.

Restriction to one of the following inventions is required under 35 U.S.C. 121:

Group I: Claim 48.

Group II: Claim 49.

Group III: Claim 50.

Group IV: Claim 51.

Group V: Claim 52.

Group VI: Claim 53.

Group VII: Claim 54.

Group VIII: Claim 55.

Group IX: Claims 56, 57 and 66-68.

Group X: Claim 58.

Group XI: Claim 59.

Group XII: Claim 69.

Group XIII: Claim 70.

Group XIV: Claim 71.

Group XV: Claim 72.

The inventions are distinct, each from the other because:

Each of Inventions I through XV are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions are each to a different combination with claim 47 being a subcombination common to all of the combinations.

Claim 47 link(s) inventions I through XV. The restriction requirement between the linked inventions is subject to the nonallowance of the linking claim(s), claim 47. Upon the allowance of the linking claim(s), the restriction requirement as to the linked inventions shall be withdrawn and any claim(s) depending from or otherwise including all the limitations of the allowable linking claim(s) will be entitled to examination in the instant application. Applicant(s) are advised that if any such claim(s) depending from or including all the limitations of the allowable linking claim(s) is/are presented in a continuation or divisional application, the claims of the continuation or divisional application may be subject to provisional statutory and/or nonstatutory double patenting rejections over the claims of the instant application. Where a restriction requirement is withdrawn, the

Art Unit: 2829

provisions of 35 U.S.C. 121 are no longer applicable. *In re Ziegler*, 44 F.2d 1211, 1215, 170 USPQ 129, 131-32 (CCPA 1971). See also MPEP § 804.01.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Any inquiry concerning this communication should be directed to Ernest F. Karlsen at telephone number 571-272-1961.
